COMPANY PROFILE

At Level Office Landscape we specialize in the **design and production of contemporary office interiors**. Founded in 2002 as part of a group working in the fields of **curtain wall, doors, windows, partitions**, our young, market-oriented company has benefitted from the group's technological innovation and experience, and undergone steady growth. In 2013 Level Office Landscape separated from the group and is now an independent company.

With an increasingly international client base, we offer architects and designers **a wealth of solutions and finishes** by supplying our own **unique furnishing systems** and creating **tailor-made products**.

The company prides itself on its ability to successfully combine industrial production and customization. This much sought-after attribute allows us to carry out ad hoc projects while still **remaining competitive and preserving quality**. In fact, our philosophy reconciles the reasoning of designers and manufacturers, favouring a so-called "project culture" over standard production.

Our office and factory are located just outside Milan, in the Brianza area, which has long been renowned for its superior products and design tradition. This is reflected in the high level of service offered by our **professional, dynamic and technically-competent staff**.

OUR PRODUCTS

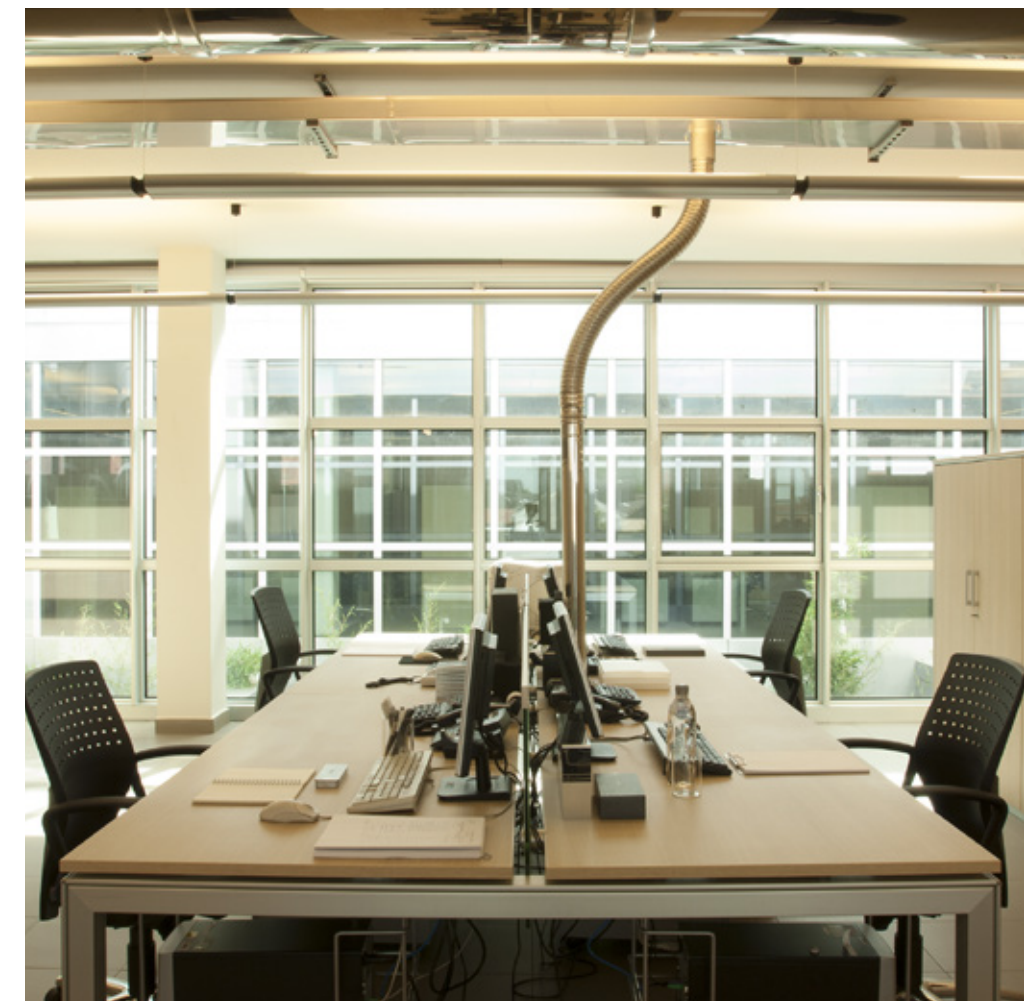

Partition walls: We create a wide range of partitions to divide spaces and form bright and soundproof offices. With single or double glazing and aluminum profiles in a variety of thicknesses, these provide flexibility for continually changing work needs and integrate perfectly into the interior design.

Equipped walls: These unit systems offer multiple solutions and composition options, including cupboards of varying heights, and are available in a wide range of finishes. They can be installed along corridors, or used as partitions to separate office areas.

Moveable walls: Our collapsible or sliding walls allow spaces to be quickly transformed by dividing them into a number of different configurations. Available in a variety of materials, and with or without vertical frames, the partitions run along floor or ceiling guides and may contain doors to connect separated areas. A state-of-the-art innovation also permits vertical sliding, with partitions that disappear into the dropped ceiling. These solutions provide flexibility while continuing to ensure a high degree of soundproofing.

Furniture systems: We also design and manufacture furnishing systems to complement the partition walls. These items are equipped to meet the specific needs of the office and allow for the optimal organization of workstations. In particular, we produce a range of desks in multiple sizes and a choice of materials.

Tailor-made furniture: Last but not least, we provide customized products and furnishing accessories for integration within projects. Our tailor-made items include reception desks and counters, equipped walls, shelves, wall coverings, chairs, blinds and screens, lighting, suspended ceilings, floors and personalized graphics.
